

Initial Training Program for Registered Pest Control Technicians

Kansas Department of Agriculture

Every pesticide business that applies pesticides for the control of the following pests is required by the Kansas Pesticide Law to submit an initial training program to KDA. Those businesses employing uncertified applicators in the following subcategories must submit their training program before registered technician cards are issued (K.S.A. 2-2440c).

Wood-destroying pests (7a)
Structural pests (7e)

Ornamental pests (3a) Interior landscape pests (3c)
Turf pests (3b)

Check a box below and write in which subcategories your initial training will cover

☐

All pesticide applicators employed by my business are commercial applicators who are certified in the appropriate categories for the application work they perform. I do not plan to hire uncertified applicators. I understand if I do hire uncertified applicators in the future I am required to submit a training program for them before they are trained.

☐

I have purchased a registered technician training program from the association checked below and I will be using this program to train my uncertified applicators:

Kansas Pest Control Association (KPCA)

Mid-America Green Industry Council (formerly PLCAMA)

CTN Educational Services

↓ List subcategories ↓

☐

I will be sending my uncertified applicators to the following trainer for the 10 hours of registered technician classroom training for the subcategories listed:

Pest Control Supplies

Mid-America Green Industry Council

↓ List subcategories ↓

☐

I have developed my own registered technician training program.

Pick one choice listed below and enclose with this form.

A copy for approval.

↓ List subcategories ↓

A copy of a KDA letter showing approval for this year.

A letter outlining how the KSU certification manuals will be used as detailed

in *Business Licensee Responsibilities for Registered Technician Training*. _____

My signature verifies that I will be using the training program selected above and indicates my understanding that all uncertified applicators must receive 10 hours of classroom training & 30 hours of on-the-job training and apply for technician registration or become a certified applicator within 90 days after they are employed (K.S.A. 2-2440a). Training records must be kept by the business as specified in K.A.R. 4-13-34.
